Select the Expansion card as the input device Typically with streaming software, the software will only look at the first two channels coming in via USB from the mixer, so it will be important to send the mix that you want to the first two USB Outputs on the mixer, so that your streaming software receives the right information.. You will notice that on the right side of the menu you can see a breakdown of which signals are routed to the outputs.. Highlight output 1 (01 @) With 01 @ highlighted, use the 4th column (OUT SIGNAL) to select MATRIX 1, and use the 5th column (TAP) to select POST FADER Repeat for Output 2 (02 @) and MATRIX 2, POST FADER On the surface of your X32, select MATRIX 1.. If you are using a P16 system you should assign OUTPUT 1-8) This is pictured below.. The latest version of X32-Edit is 3 2 on Mac Informer It is a perfect match for Device Assistants in the System Tools category.. Views: X32 – How do I Setup for Live Streaming with V4 firmware? This

guide is intended to assist with setting up a stereo output stream from your X32 to a streaming software like OBS or FB Live..
Open the HOME menu and press the LINK button (1st encoder) to link MATRIX 1 and MATRIX 2 as an LR pair. e828bfe731
