About This Content

Remember the epic 80's movie Conan the Barbarian? Now you can get your hands on several unique items from the movie along with many statues and figurines of its iconic characters.

Place statues of Arnold Schwarzenegger as Conan the Barbarian in your castle and sit upon the magnificent Lion Throne from the movie! Equip yourself with Conan's helmet and put on warpaint just like the heroes from the movie.

The Riddle of Steel contains:

- 18 Statues and figurines of Arnold Schwarzenegger as Conan
Three poses of the statues and small figurines in three different materials each
- 5 iconic helmets from the movie, of characters such as Thulsa Doom and Rexor
Same power as iron tier with an epic end-game version of each
- 5 unique placeables from the movie, such as the Atlantean Throne
Craft King Conan's Lion Throne or Setite Cult statues
- 6 statues and figurines of Valeria from the movie Conan the Barbarian
Both the statues and figurines come in three different materials

-
- 6 statues and figurines of Subotai the Hyrkanian archer
Both the statues and figurines come in three different materials

- 3 decorative warpaints from the movie
Paint yourself like Conan, Valeria and Subotai before their attack on the Setities

The Riddle of Steel is not part of the four core DLCs of 2019. As such it is not included in the Year 2 Season Pass.

All content from The Riddle of Steel is exclusive to this DLC and adds many new visual options but does not give any in-game advantage in power. All new items have comparable stats to existing items.

Title: Conan Exiles - The Riddle of Steel
Genre: Action, Adventure, Massively Multiplayer, RPG, Simulation, Strategy
Developer:
Funcom
Publisher:
Funcom
Release Date: 9 May, 2019

a09c17d780

OS: Windows 7 64 Bit/ Windows 8 64 Bit/ Windows 10 64 Bit

Processor: Intel Quad Core i5-2300 or AMD FX-6300

Memory: 6 GB RAM

Graphics: Nvidia GeForce GTX 560 (1GB) or AMD Radeon HD 7770 (1GB)

DirectX: Version 11

Network: Broadband Internet connection

Storage: 10 MB available space

English,French,German,Japanese,Korean,Polish,Russian,Simplified Chinese,Traditional Chinese,Italian

Kalymn attacks!

This game looks like it could have potential. I like the resemblance to Mace:the Dark Age for the N64 where all the characters have a weapon and are clearly medieval fighters. I'll watch the development of this game and look forward to a completed version. This game has no controller support. I hope controller support is in the next new edition of the game. For only \$5 bucks it might be worth your consideration because when the game goes live it'll probably be \$59.99. I love hack and slash so I might be biased towards my own interests.. That Turkey !! That Turkey !! Never tired !!

1 "Auto Clicker" for LVL UP

1 "Auto Clicker" for Clicker

Go Go. The product was extremely laggy even with a wired connection. Was weird using a keyboard and mouse on the TV and the controller play just wasn't smooth. It is a great idea though and I'd be looking forward to tryout a 2.0. Don't let me down again valve. It's fun for about 1 hour and it barely ran for me. There is also very little content, seen 1 battle between knights and chickens seen em all. Overpriced and underwhelming, I don't recommended it and if you really about battle simulations get TABS (totally accurate battle simulator). Crappy horn and bell, but everything inside works such as the opening doores and windows, would strongley recomend if you love shunting locomotives.. Fun game, but grindy. In fact, with the right combination of trash gear, you can keep going until you simply don't do enough damage to kill fast enough, then upgrade to the appropriate level of trash gear, and repeat the process. Rerolling the gear is fun as always, but costs are too high for rare gear. Charge ability is a bit OP, whereas nukes aren't that useful. All in all a fun game that requires very low initial time investment (as opposed to say, Diablo III).

Still highly recommended however, as I find this great for stress relief.

who made this garb and why is it on steam

. You basically walk around aimlessly the entire game, just dragging your items on people, or random objects hoping they progress the game since there is no rhyme or reason behind almost all of the puzzles.. You got this from preordering. I played this game once then again and again and again then once more.. Nice game, most of the riddles are easy to solve, sometimes it won't recognize that you correctly clicked on a found item.

Played it on normal setting and with some pauses it was finished in 5 hours (bonus level included)...guess without pauses it would take around 3 hours. Most of this time is not spent with solving the riddles but with running from one screen to another searching for those riddles aka needed items.

If you are a fan of hidden-object games you could give it a try (after you played the other better games first).

All in all i would give it a 6/10. Back in 1997 or 1998, I loved the original version of this game.

But this version is simply unplayable for me because it won't let me configure control. In this version, I can configure buttons but I CANNOT configure axis. This is a fatal problem for me.

I hope the developer can add the configuration functionality.. After a loooooong time without any updates, I thought the developers abandoned the application so I jumped ship to Driver Booster 5.

Eventually, Driver Fusion was finally updated with lack luster results.

A UI change that I think was a giant step back Annoyed me the most. You can no longer choose between just solely backing up or checking for driver updates. Now you HAVE to do both at the same time which is exceeding time consuming. What are we? Mac users? Give us the option to choose please.

A test run broke my USB 3 ports rendering them unusable. Note uninstalling and deleting the driver from device manager can fix this. Then run a hardware scan from Device manager and it automatically choose the right driver is the final step.

Though I think the nail in the coffin for me was when a pop-up started showing after login at the bottom right corner of my screen. This was not a discreet one, it had to manually closed.

So after using this and driver booster 5 for a year I have finally decided to uninstall the product (Driver Fusion). Driver Booster does what you used to do better. Thanks guys it was a hell of a run I had used you for years. But lack of updates, a driver update snafu (which really shouldn't happen since this is the whole point of your product) and an intrusive pop-up just wore me out.

Sorry, but it's you not me.

Sincerely,

Nanuk

UPDATE:

Thanks for replying. I'll probably reinstall with the next update. I guess you can't please everyone with the changes. Sadly I'll be one of those that will not be happy.

Sorry the logs were lost with the uninstall.

UPDATE 2:

So I tried the new version, but it still breaks USB 3 which can be fixed if I uninstall the driver and let Windows use it's default driver. Now it does the same with my Bluetooth as well. It's fixed the same way I fixed USB 3.

I have logs this time. Where do you want me to send it?

I'm glad that you can now check categories off and on in health check now.
