It was released for Microsoft Windows, OS X, and Linux on Steam and GOG.com on February 20, 2013, and features a mixture of first-person exploration, space combat and puzzle solving. Its gameplay was inspired by Elite and Descent. The game was announced on January 17, 2013. In July 2012, Double Fine announced an exclusive partnership with Microsoft to bring the game to Windows and OS X, and it was released in late 2013. Due to the small team size, it was first released as a freeware title, but it later became a paid-for downloadable game on Steam and GOG.com. Gameplay Spacebase DF-9 is a hybrid space simulator game, combining the first-person exploration, puzzle solving and combat of Elite and the strategy and physics of Descent. It features over 160 puzzles and 16 unique environments that are all procedurally generated and require solving, making gameplay varied and challenging. Some puzzles require that players build and fly a starship or construction station, while others require that players use tools to break blocks and perform other actions. The game has a sandbox-like structure and most puzzles can be solved in any order the player sees fit. When completed, puzzle and environment solutions are recorded and players can view an "epilogue", which may contain hints or other solutions to other puzzles. Spacebase DF-9 features both single-player and multiplayer modes. In the single-player mode, players have a large amount of freedom as to how they approach puzzles and how they tackle puzzles. They can quickly learn the environment and solve the puzzles from either a first-person or third-person viewpoint. Players have access to their spacecraft and construction station, and are able to travel through space. A large amount of gameplay is spent exploring the space environment and locating objects that can be used to move forward in the game. A multiplayer mode is also available. In this mode, two players share a spaceship and can share the screen for combat and exploration. Multiplayer mode is locked to LAN networks. A single-player campaign can be played with a second player. In this mode, one player can play as the Captain of a Fighter Jet, and the other player can play as the Captain of a Retronaut, whose job is to locate the Captain and deliver him a new space suit. Plot Spacebase DF-9 is set in the year 2038. The last remaining human nation, led by Stacey Shepard, works to contain an unidentified viral outbreak that is 82157476af
